

# Decoupling min\_size from Write Acknowledgment

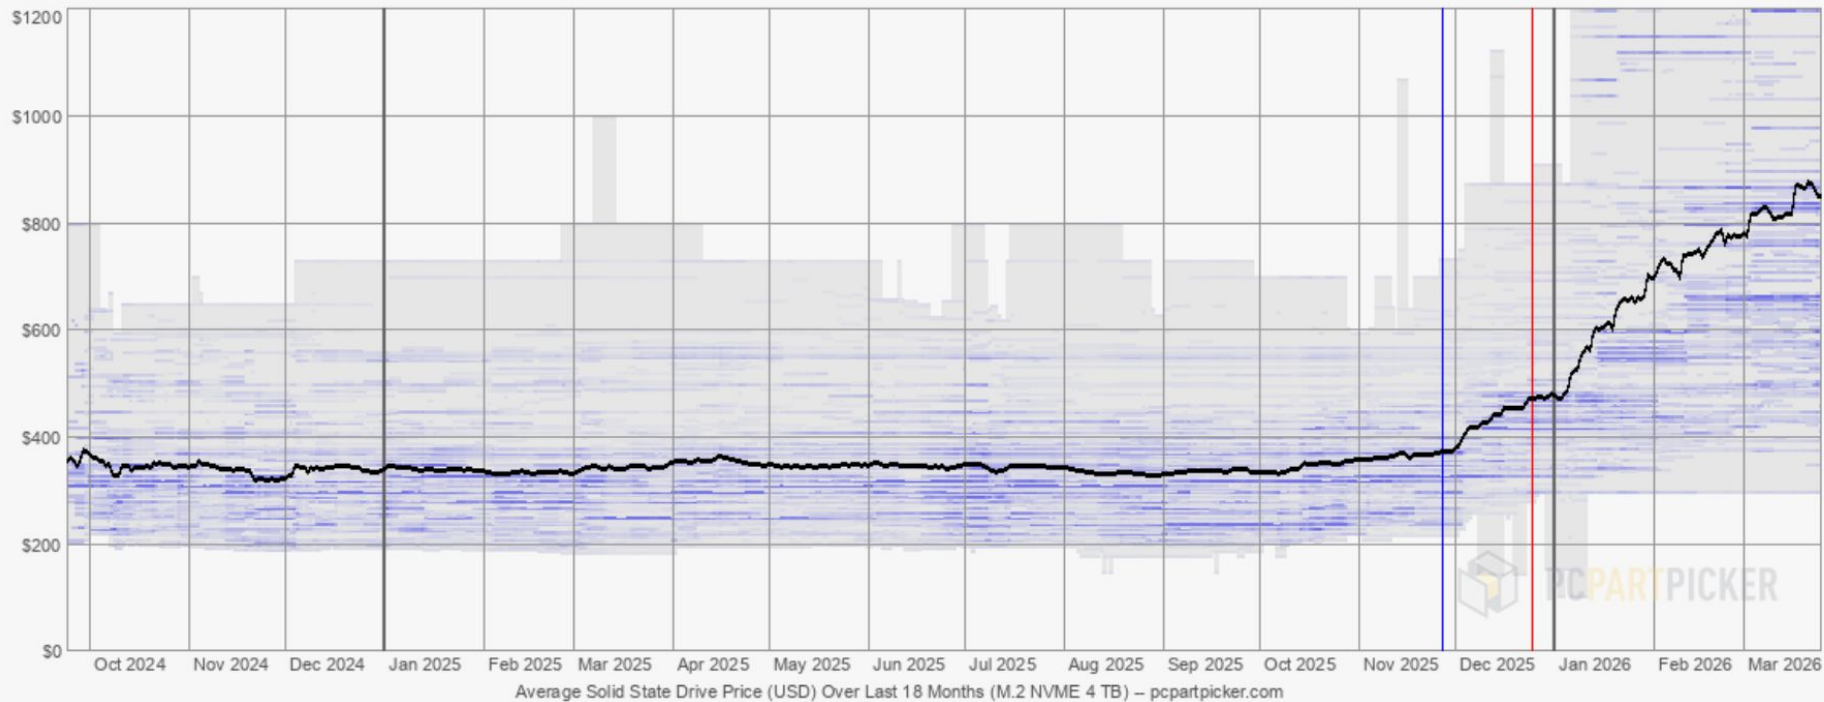

Andrew Malsbury  
Managing Partner - FoleyBridge Solutions

# Who am I?

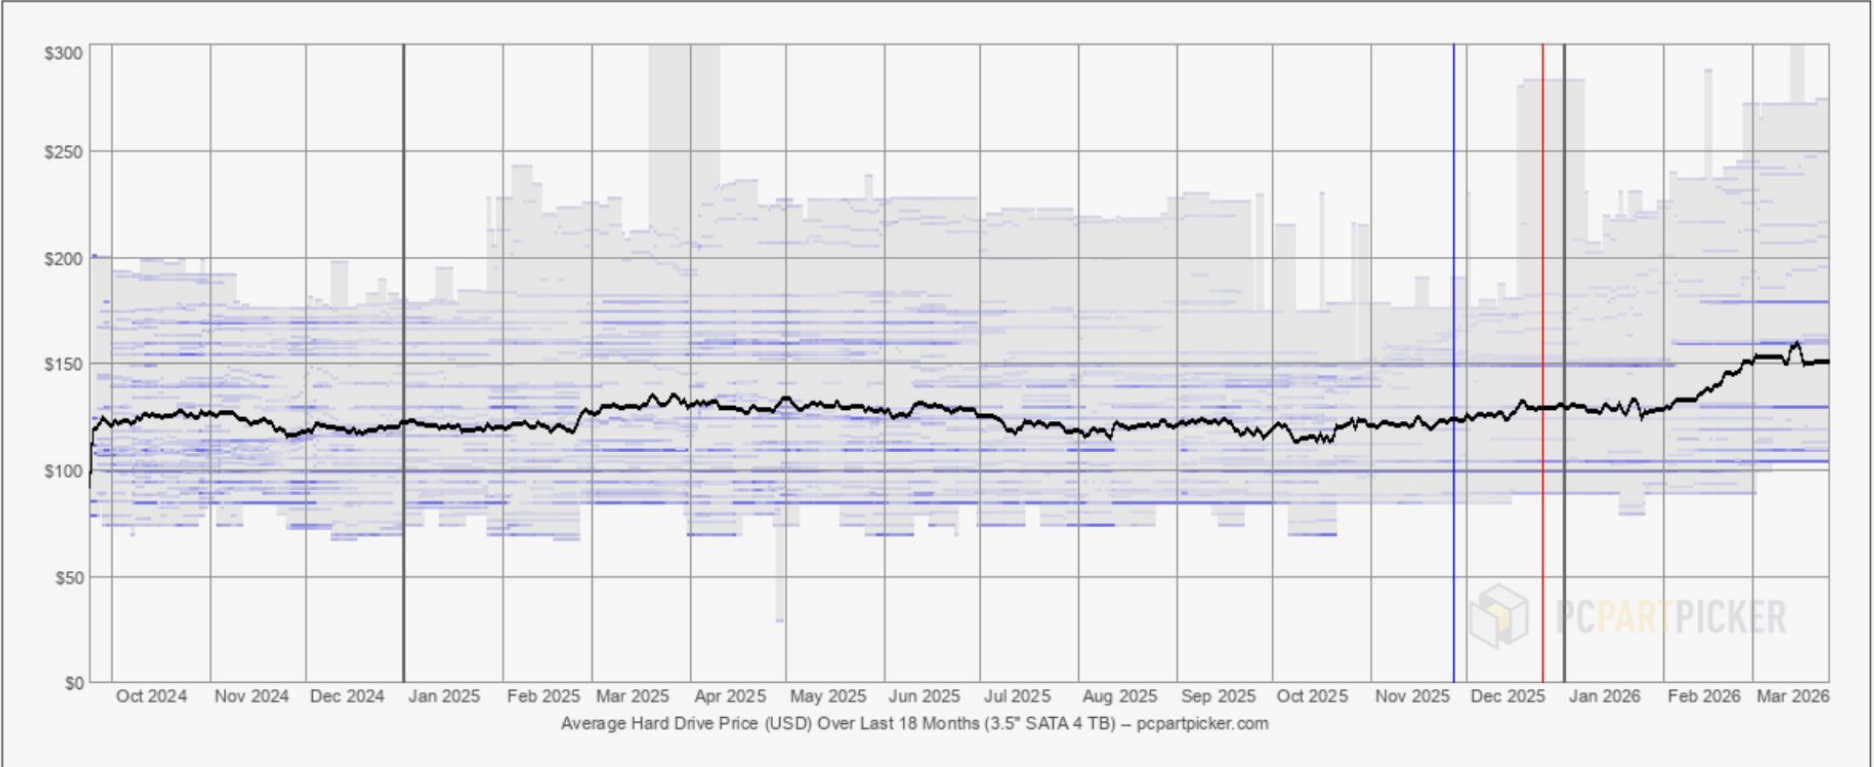

- I am a SME consultant who specializes in pulling infrastructure from cloud, leveraging Proxmox and Ceph to build fully Hyperconverged Highly Available systems, and doing so at an unbeatable value.
- In Dec 2024, I left my role as Head of Operations for a small Managed Service Provider.
- Started using Ceph in early 2017, with a simple 3 node server in my homelab.
- Currently support a lot of Windows VDI, or Windows MSSQL Database servers.
- TCO has increasingly become a decision factor when quoting out builds.

## Solid State Drive - M.2 NVME 4 TB (Average price in USD over last 18 months)

\* Amazon pricing is not included in price trends graphs.

# Hard Drive - 3.5" SATA 4 TB (Average price in USD over last 18 months)

\* Amazon pricing is not included in price trends graphs.
